3. The expiration of COCOMP is a milestone in the continuing community effort to rationalize protection for, and effective use of, Sensitive Compartmented Information. The past three years or more have involved much work by a significant number of people throughout the community. Many views and interests have been expressed, weighed and compared. I believe that this effort has laid the groundwork for the further development of SCI policy and procedures which should endure for years to come. I extend my appreciation and thanks to all who participated in this endeavor. ☐
